

# PRESERVE

Ethical and Privacy-Preserving Big Data Platform Supporting Criminal Investigations

*This project has received funding from the EU's Horizon Europe Research and Innovation programme under grant agreement N°101168309*

PRESERVE

PRESERVE will design, implement and validate a privacy-preserving law enforcement and decision-support toolbox compliant with EU ethical standards for AI.

The project will leverage AI models to analyse large volumes of data from diverse sources, identifying patterns associated with cybercrime and terrorism to enable proactive threat detection and prevention.

The PRESERVE toolbox will be validated across four high-impact, real-world use cases.
